

# High availability

Enterprise Image Management that truly supports patient-centered care

**SECTRA**

Knowledge and passion

## SYSTEM AVAILABILITY

Designed for high-production environments, where constant availability is key.

Examples of total measured uptimes over the past three years at large sites, enabled by proactive monitoring and unique system design:

University Hospital Southampton, UK

100%

ProMedica, USA

100%

University Medical Center Utrecht, the Netherlands

99.997%

Region Skåne, Sweden

99.996%

Hospital for Special Surgery, USA

99.988%

## TOOLS AVAILABILITY

Access to all tools from a single workstation, anywhere in the enterprise.

Diagnostic applications increasing clinical efficiency and the ability to communicate actionable reports through:

Intuitive user interface and minimized mouse mileage

Advanced visualization tools with a targeted oncology portfolio for radiology

Integration with third-party applications

Image-close reporting with integrated speech

Broad portfolio of imaging applications available through Sectra HealthCloud

Continuous no forklift upgrades ensure access to latest tools and development

## INFORMATION AVAILABILITY

Instant access to images and data created along the patient pathway.

Consolidated access from a single workstation

Multi-modality, multi-vendor capabilities

Unbeatable track record of EMR integrations

Fast and intelligent transfer of data regardless of size

Efficient collaboration concerning the patient

Strong support for multidisciplinary team meetings

Diagnostic applications built on the same IT infrastructure, facilitating integrated diagnostics

Solutions for collaborative and cross-enterprise image sharing

Sectra VNA for consolidation of image handling

## COMPANY AVAILABILITY

Accessible organization with a customer-centric culture.

Top-rated global helpdesk

Agile development and User-Influence web community for customer-driven development

Future-proof solutions that actually make a difference
