

High availability Enterprise Imaging

System Availability

Designed for high-production environments, where constant availability is key.

Proactive and continuous system monitoring—leading to an average worldwide system uptime of +99.999%

Tools Availability

Access to all tools from a single workstation, anywhere in the enterprise.

Diagnostic applications increasing clinical efficiency and the ability to communicate actionable reports through:

- » Intuitive user interface and minimized mouse mileage
- » Advanced visualization tools with a targeted oncology portfolio for radiology
- » Integration with third-party applications
- » Image-close reporting with integrated speech

Broad portfolio of imaging applications available through Sectra HealthCloud

Continuous no-forklift upgrades ensure access to latest tools and development

Information Availability

Instant access to images and data created along the patient pathway

Consolidated access from a single workstation

Multi-modality, multi-vendor capabilities

Unbeatable track record of EMR integrations

Fast and intelligent transfer of data regardless of size

Efficient collaboration concerning the patient

- » Strong support for multidisciplinary team meetings
- » Diagnostic applications built on the same IT infrastructure, facilitating integrated diagnostics
- » Solutions for collaborative and cross-enterprise image sharing
- » Sectra VNA for consolidation of image handling

Company Availability

Accessible organization with a customer-centric culture.

Top-rated global helpdesk

Agile development and User-Influence web community for customer-driven development

Future-proof solutions that actually make a difference
